**General Water Announcement - Hurricane Season:** Hurricane Season (Friday, June 1 thru Friday, November 30, 2018) has begun, and we should all be prepared for any emergency. The Honolulu Board of Water Supply (BWS) would like to give you some tips for storing water in case of emergencies: Your Emergency Preparedness Kit should include at least one (1) gallon of water stored, per person, per day for at least

fourteen (14) days for drinking and sanitation purposes. The easiest and most efficient way to prepare and store your emergency water supply, is to:

- Take water from the tap. We recommend you use a clean container to store water. Try not to use containers that have previously been used to store food with strong odors, as the water will pick up the odors during storage.
- Disinfect your containers by washing them thoroughly with soap and water.
- To ensure the container is sanitized, use one (1) capful of a mild liquid bleach to one (1) gallon of water, then rinse thoroughly.
- Fill your container with water from the tap; fill it to the top, keeping a minimal amount of air between the water and the cap.
- To ensure that your water is safe to drink, add one (1) drop of mild liquid bleach, per gallon of water; cap and store it in a cool, dark, place.
- If you plan to store water for four weeks or longer, add one-half (1/2) capful of mild liquid bleach per gallon of water; cap and store in a cool, dark, place.
- For more information on water emergency preparedness, visit our website, at [www.boardofwatersupply.com](http://www.boardofwatersupply.com).
- On another matter, Summer starts this month, Every Summer, for more than a decade. BWS has been supplying its customers with an Annual Water Quality Report. The report will be mailed to all BWS customers on record starting this month. They are also available online via the BWS website. 2. Restoration: Colonel Moore assured that all the materials are present for the restoration of the monument barring items that have been damaged before the monument's removal.

Questions & Concerns:

1. Location: There was conversation on the best possible location for the monument and Vaughn noted that they believe that best location for the monument would be near the parking lot. Vaughn believed this location was best due to its prominence within the area and the foot traffic that would help deter future damages. Ferreira agreed with Vaughn and stated that the monument should be placed in near the parking lot. Ferreira also raised opposition for the placement of the monument behind the Kalaeloa Airport building.
2. Public Meeting: Vaughn reiterated the Saturday, July 14, 2018 meeting at 9:30 a.m. and stressed the importance of public input while relocating the monument.
3. Community Support: Ferreira stated the importance of community support for the relocation of the monument and noted that the State wants to find a location that is both safe and visible to the public.

Makakilo Drive Extension: Councilmember Kymberly Pine was unable to attend to meeting but Stensrud read the following report from Pine's Office:

This project is still in the design phase and is moving along, albeit not as fast as some would like. One reason for the appearance of no activity is because the original design incorporated several elevated roadway bridges. After meetings between the Department of Design and Construction, Department of Transportation Services, and the architect RM Towill, it was decided to alter the route so that these bridges would not be necessary and as such the projected cost of the overall project was reduced by approximately \$30 million. Also, secondary to this change Councilmember Pine was able to secure an additional \$1.5 million in the FY18 budget for preliminary engineering. This was added to the \$4.5 million she secured in FY16 & FY17. Based on the new design other preliminary assessments of the Project Engineering Phase such as acquiring new permits and undertaking new environmental assessments had to be taken care of as the original ones were now obsolete. Once the studies and final design phase has been completed and accepted, then the process of acquiring the land will move forward.

DTS tells me: "The draft EA is expected to be completed and released for public comments by Fall of this year. After all the environmental permits have been completed, the Final EA should be completed by Summer of 2019. RM Towill is continuing to work on the design of new roadway which is currently scheduled to be on the TIP for Federal Fiscal Year 2027 (after the Salt Lake Widening and Farrington Highway Widening projects).

Please note that partial funding for this project does come from the Federal Government. I'm told they only release \$17 million dollars a year for State/City/County projects and will only release those funds to projects where the engineering phases have been completed and construction is ready to begin. When this project reaches that point, the Departments of Design and Construction and Transportation Services will engage the Federal Government for those funds.

For further updates on this and other projects for our community please feel free to check on Councilmember Pine's website [www.councilmemberpine.com](http://www.councilmemberpine.com). I hope this addresses your concerns regarding the current process for the Makakilo Drive Extension project. Should you have any further questions please feel free to email us.

**Souza left the meeting at 8:15 p.m., eight (8) members present.**

Questions & Comments:

1. Apathy: Genadio noted apathy towards the completion of the Makakilo Drive extension project and stated that the problem will persist until there is an emergency event. Genadio stated a need for community support towards the completion of the project. Genadio felt the 27 year project has been a ridiculous waste of time.

Chair Dudley asked and Genadio answered that residents should send all their concerns about Makakilo Drive to the Oahu Metropolitan Planning Organization (OMPO) at [oahumpo.com](http://oahumpo.com). Dudley noted that the 2027 completion date is outrageous. Wond asked for the reason why the project has not been completed and noted that Makakilo has been forgotten. Wond stated that the 2027 completion date is unsatisfactory.

2. Kapolei Property Development: Genadio noted that the Kapolei Property Development is unwilling to finish the project and support local businesses more than the community. Genadio stated that the project has been planned since 2007/2008 but a lack of pressure on the contractors has allowed the project to go unfinished. Genadio asked that Councilmember Pine, the Mayor's representative, and the head of the Department of Transportation Services be in attendance.
3. Extension Support: Legal noted the Board's written resolution in support of the Makakilo extension project but stated that the Board has a poor relationship with public officials. Legal stated a need for a better relationship with local politicians. Legal spoke about a long history of failed public projects in the region and thanked Genadio for their hard work. Legal noted that written resolutions and letters have been ineffective. Brekberg noted that a community writing campaign may be the best way to gather support for the project. Spreg noted that Pine has supported the Makakilo extension project and stated that the Chamber of Commerce wants residents to drive through the shopping district.
4. Funding: Ferreira noted the extensive amounts of accidents that occur on Makakilo Drive and stated that Pine has worked hard towards the finishing of the project. Ferreira stated that the project is short 300,000 dollars for the funding of the Design Phase and that the project is 70 percent complete with the design.
5. OMPO: Genadio stated that the key to the issue is the OMPO Policy Board and that Councilmember Brandon Elephante is the Chair of the OMPO Policy Board.
6. Policy Board: Genadio stated that the OMPO Policy Board meets at Honolulu Hale. Please visit <http://www.oahumpo.org/category/news-announcements/> for any OMPO announcements and meeting information. Genadio noted that other projects have been able to surpass the Makakilo project due to a lack of support and is unsure how the Makakilo project has a lack of funding.

**Cullen left the meeting at 8:45 p.m., seven (7) members present.**

TREASURER'S REPORT: Wond reported a remaining balance of \$239.43.

The HOLO cards will be available to the general public early next year, and you will be able to get your card at any of the 100 plus stores participating in our retail network, any Satellite City Hall, or at the bus customer service center at 611 Middle Street.

Once the program starts, you can register your card and create an on-line account. Doing so will allow you to add money on your card, monitor your card balance, or easily manage multiple cards for your family or group. It also protects your account in case your card is lost or stolen; then your balance can be transferred to a new card.

There will be no regular fees or service charges for using the HOLO card, however there is a \$2.00 one-time charge for a new or replacement card, and a \$2.75 minimum when you load or reload funds to your card.

You can also access HOLO from your web browser on your smart phone, but you don't need a smart phone, bank account or the internet to load money on your card.

When the cards become available, you can activate and load money on your HOLO card in several ways: at holocard.net; by calling (808) 768-HOLO which is "768-4656"; at any of the over a hundred stores participating the program, any satellite city hall, or at the bus pass office on Middle Street.

All existing passes will be available on the HOLO card. The current programs for youth, seniors, disability and those on Medicaid, and other bus pass subsidies will be available on your HOLO Card by registering for those passes.

Everyone six years of age and above will need to have their own HOLO card.

The City DTS, OTS and HART are collaborating on the HOLO Card and will soon launch a pilot program to test the new HOLO cards on the bus. Once that is completed and the program is in operation, the cards will become available to the general public.

For more information on the rail project, please visit our website [www.honolulutransit.org](http://www.honolulutransit.org), you can call the project hotline at 566-2299 or email a question to [info@honolulutransit.org](mailto:info@honolulutransit.org)
